PROFESSIONAL SUMMARY

Strategy and market research professional with 5+ years across competitive intelligence, GTM strategy, M&A target screening, and primary/secondary research spanning consulting, EdTech, and pharma/life sciences. Currently drives strategic solutioning and market research at Teleperformance, leading initiatives that delivered an 18% CSAT improvement and informed go/no-go decisions worth USD 10Mn+ in cost savings. Built two research verticals from zero at Roots Analysis and led a 400+ respondent, government-commissioned industry study at Ken Research. Hands-on with Python-based GenAI workflow automation, Power BI, Tableau, and intelligence databases including CB Insights, Capital IQ, Refinitiv, EMIS, IDC, and ISG. Executive MBA (Digital Transformation Analytics) from IIM Sirmaur complete, paired with a B.Tech in Biotechnology for added pharma and healthcare domain depth.

KEY SKILLS

- **Strategy & Consulting:** Corporate strategy, GTM strategy, growth strategy, M&A target screening, feasibility studies, business case development, value realization modelling, strategic prioritisation, Choice Cascade, Strategy Diamond, Balanced Scorecard, SWOT, PESTLE
- **Market & Competitive Intelligence:** CI monitoring cadences, competitive landscape mapping, market sizing, whitespace identification, competitive benchmarking, investment thesis development, patent landscape intelligence
- **Research & Analytics:** Primary & secondary research, survey design, hypothesis-driven analysis, statistical analysis, scenario modelling, Voice of Customer (VoC)
- **Tools, Databases & GenAI:** Python (prompt engineering, LLM workflow automation), Power BI, Tableau, Advanced Excel, CB Insights, Capital IQ, Refinitiv, EMIS, IDC, ISG

PROFESSIONAL EXPERIENCE

Teleperformance | Senior Research Analyst, Consulting & Solutioning | Gurugram Apr 2025 - Present

- Co-led an AI product pitch programme across 200+ enterprise accounts, directing an 8-person team and building value realization models covering 10+ Customer Service KPIs per account.
- Led a 2-month customer service strategy study for a global hospitality technology client, surveying 1,000+ agents across 35+ parameters, identifying 10+ process gaps and driving an 18% CSAT improvement.
- Led market estimation and feasibility studies across 6+ products, informing go/no-go decisions that delivered USD 10Mn+ in cost savings.
- Evaluated 200+ companies across 20+ parameters as part of an M&A target screening initiative, and ran a weekly competitive intelligence cadence using Python-based LLM automation for ~35% efficiency gains.

Ken Research | Research Analyst II | Gurugram Jan 2024 - Mar 2025

- Led a team of 2 analysts delivering a government-commissioned Industry Perception Study across 120 employers and 4 states, gathering 400+ survey responses that directly informed policymaker decisions.
- Developed end-to-end GTM strategy for a premier higher education institution's online degree portfolio, optimising pricing, delivery design, and market positioning across 20+ programmes.
- Led an ITI skills landscape study for a leading national education and skilling NGO, conducting 200+ employer interviews across 4 states and engaging 50+ students.
- Instituted QA protocols that cut revision cycles by 40% and lifted first-draft acceptance above 85%, sustaining 100% on-time delivery over 14 months.

BIS Research | Research Analyst | Noida Jan 2023 - Jul 2023

- Conducted mixed-method primary research (surveys, expert interviews, focus groups) across 6 healthcare and technology verticals, including pharma competitive intelligence and statistical analysis.
- Built 8 advanced Excel templates that improved team analysis speed by 40%, while sustaining a 95% on-time delivery rate.

Roots Analysis | Business Analyst, Data Specialist L2 | Mohali Sep 2020 - Dec 2022

- Built two research verticals (Investor Series, Patent Landscape) from zero to 20+ modules each, contributing directly to a 15% company revenue increase within 12 months.
- Delivered pharmaceutical secondary market research spanning 500+ company profiles across 15+ global markets, including disease landscape and pipeline analysis.
- Led automation initiatives that improved workflow efficiency by 70%+, cutting report preparation time from 4 hours to under 90 minutes.

KEY PROJECTS

- **Personal builds:** Customer Sentiment Analyzer (Python, LLM-based taxonomy generation, Tableau) for end-to-end VoC analysis; Clinical Trials Analyzer for evidence-based trial design, performance benchmarking, and strategic decision support.
